Classic Chicken Layer Pellet

Classic Chicken Stockfeed blends grains and protein meals with BioChar Activated™ **Feed Additive**, to provide your flock with all the essential mineral and vitamin requirements for optimum health and productivity.

Our **Classic Chicken** offers you an affordable and environmentally friendly option while delivering superior health to your poultry.

Nutrition

Provides all the essential minerals for poultry, considering the requirements and differences of foraging behavior, age and stage of production. The key ingredient is our BioChar Activated™ Feed Additive which increases production through its ability to promote positive gut health and extend feed retention time which improves the Feed Conversion Ratio and aids in weight gain.

Superior Health

The BioChar Activated™ Feed Additive improves livestock health through promoting favourable gut micro flora, the binding of mycotoxins, and removal of pathogenic flora (e.g. Campylobacter and Heliobacterium).

Environmental Benefits

Reduction in nitrogen loss and greenhouse gasses (reduced odour) due to enhanced Cation Exchange Capacity, decreased Ureolytic activity, and decreased PH or aeration. The value of manure is also improved creating a more stable fertiliser with higher nitrogen, phosphorus and potassium values and stable carbon to add to your soil.

CLASSIC CHICKEN LAYER PELLETT

SOFT AGRICULTURE

PRODUCT DESCRIPTION

Classic Chicken Layer Pellet is a premium quality feed for laying hens. It provides a nutritionally balanced diet and is suitable for high producing laying hens as well as backyard layers. The addition of BioChar Activated™ Feed Additive will increase egg production, decrease manure odour and improve the health and wellbeing of your hens.

TYPICAL COMPOSITION

Cereal grains, legumes and pulses, vegetable protein meals, vegetable oils, salt, limestone, bentonite, MDCP, BioChar Activated™, amino acids, enzymes, vitamins and minerals. Raw materials may change depending on seasonal variability.

DIRECTIONS FOR USE

- Classic Chicken Layer Pellet is a complete feed and supplementary feeding is not required.
- Feed from point of lay (approximately 18 weeks of age).
- Provide unlimited access to feed, ideally in a feeder.
- Ensure that fresh, cool and clean drinking water is available at all times.
- Approximate feed intake is 100 – 120 grams / bird / day. This may vary depending on age of bird, health of bird, season and other environmental factors.
- Egg production may decrease during winter with the reduction of daylight hours.
- Egg shell quality may decline in hens approaching end of lay. Providing ad lib access to shell grit may improve egg shell quality.

NUTRITIONAL ANALYSIS

CRUDE PROTEIN	ENERGY (ME)	FIBRE (NDF)	FAT
17%	12 Mj/Kg	11%	4%
PHOSPHOROUS	CALCIUM	LYSINE	SALT
0.4%	3.8%	0.9%	0.4%
METHIONINE	VIT. A	VIT. D	VIT. E
0.4%	8 Kiu	3 Kiu	5 Kiu

QUALITY PRODUCT

This product is manufactured under strict quality control standards.

WITHHOLDING PERIOD

Nil.

WARNING

Feed only to poultry.

This product does not contain urea or medication.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

STORAGE

Store in a cool, dry, shaded area, protected from vermin.

BEST BEFORE

3 months from manufacture.

PACKAGE SIZE

25 kg bags, 500 kg bulka bags, 1000 kg bulka bags, bulk.
