# Classic Cow Calf Starter Pellet

**Classic Cow Stockfeed** blends grains and protein meals with BioChar Activated **Feed Additive**, to provide your herd with essential minerals and vitamins requirements for optimum health and productivity.

Our **Classic Cow Stockfeed** offers you an affordable and environmentally friendly option while delivering superior health to your cattle.

## **Nutrition**

Provides essential minerals for cattle, considering the requirements and differences of foraging behavior, age and stage of production.

Increases production due to binding of Mycotoxins and positive gut health. BioChar Activated Additive extends retention time of feed and improves the Feed Conversion Ratio (FCR).

## **Superior Health**

The key ingredient is a specially formulated blend of biochar for animal ingestion to improve livestock health through favourable gut micro flora and removal of pathogenic flora (e.g. Campylobacter and Heliobacterium), aiding weight gain and ultimately improving the profitability of your beef operation.

## **Environmental Benefits**

Reduction in nitrogen loss and greenhouse gasses (reduced odour) due to enhanced Cation Exchange Capacity; decreased Ureolytic activity; and decreased PH or aeration.

The value of manure is also improved creating a more stable fertiliser with higher nitrogen, phosphorus and potassium (NPK) values and stable carbon to add to soil values for future carbon credits.

# CLASSIC COW CALF STARTER PELLET

# SOFT AGRICULTURE

## PRODUCT DESCRIPTION

Classic Cow Calf Starter Pellet is a premium quality, high energy and high protein formulated feed for calves to maximise growth. The ration is suitable for early weaning or creep feeding of calves less than 100kg live weight. The grain based pellet helps with rumen development which leads to earlier and easier weaning, which can take pressure off lactating cattle. The addition of Activated Biochar will increase weight gain, improve feed conversion ratio, decrease methane emissions and improve the health and wellbeing of your cattle.

## TYPICAL COMPOSITION

Cereal grains, legumes and pulses, vegetable protein meals, vegetable oils, salt, limestone, bentonite, MDCP, BioChar Activated, vitamins and minerals.

Raw materials may change depending on seasonal variability.

## DIRECTIONS FOR USE

- Classic Cow Calf Starter Pellet is not a complete feed. It must be fed in conjunction with roughage or pasture grazing.
- This ration must be introduced slowly to allow the rumen to adapt and to prevent ruminal acidosis. Over a 3-week period, gradually increase the amount of pellets fed and reduce the amount of roughage fed.
- Roughage should make up no less than 20% of the animal's total dry matter intake.
- Ensure that fresh, cool and clean drinking water is available at all times.

**Classic Cow Calf Starter Pellet can be used for the following conditions as a guide only:**

**Early Weaned Calves:** Young milk fed calves can be offered Classic Cow Calf Starter Pellet from ad lib from birth to weaning or 3 months. Young calves will not gorge on a feed if they are introduced to it from an early age, provided it does not run out for a prolonged period. Calves can be allocated 0.5 - 1kg / day in a self-feeder up to 12 weeks.

AGE	EXPECTED FEED INTAKE (KG / HEAD / DAY)
BIRTH - 1 MONTH	UP TO 0.5
1 - 3 MONTHS	0.5 - 1
3 - 6 MONTHS	1 - 2

**Creep Feeding:** Classic Cow Calf Starter Pellet can be placed in a creep feeding program with calves having free access in a covered trough or self-feeder. Only the calves should have access to the feed. Feed intake is approximately 2kg / head / day.

## NUTRITIONAL ANALYSIS

CRUDE PROTEIN	ENERGY (ME)	FIBRE (NDF)	CALCIUM
20%	13.3Mj/Kg	9%	1.2%
PHOSPHORUS	FAT	STARCH	SALT
0.6%	5.9%	32%	0.6%
MAGNESIUM	COPPER	SELENIUM	SULPHUR
0.3%	30 ppm	0.4 ppm	0.1%

## QUALITY PRODUCT

This product is manufactured under strict quality control standards.

## WITHHOLDING PERIOD

Nil.

## WARNING

Feed only to cattle. This product contains Bovatec® to improve feed conversion and prevent coccidiosis. Do not feed to dogs, horses or other equines. This product does not contain urea or medication. **THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.**

## STORAGE

Store in a cool, dry, shaded area, protected from vermin.

## BEST BEFORE

6 months from manufacture.

## PACKAGE SIZE

25kg bags, 500kg bulka bags, 1000kg bulka bags, bulk.
