

Green Chicken Stockfeeds

Green Chicken Stockfeed blends Certified Organic grains and protein meals with Biochar Activated **Green Chicken Feed Additive**, to provide your flock with all the essential mineral and vitamin requirements for optimum health and productivity.

Our **Green Chicken Stockfeeds** offer you an affordable and environmentally friendly option while delivering superior health to your poultry.

Nutrition

Provides all the essential minerals for poultry, considering the requirements and differences of foraging behavior, age and stage of production.

Increases production due to binding of Mycotoxins and positive gut health. Green Chicken Feed Additive extends retention time of feed and improves the Feed Conversion Ratio (FCR).

Superior Health

The key ingredient is a specially formulated blend of biochar for animal ingestion to improve livestock health through favourable gut micro flora and removal of pathogenic flora (e.g. Campylobacter and Heliobacterium), aiding weight gain and ultimately improving the profitability of your poultry operation.

Environmental Benefits

Reduction in nitrogen loss and greenhouse gasses (reduced odour) due to enhanced Cation Exchange Capacity; decreased Ureolytic activity; and decreased PH or aeration.

The value of manure is also improved creating a more stable fertiliser with higher nitrogen, phosphorus and potassium (NPK) values and stable carbon to add to soil values for future carbon credits.

Ingredients

Cereal grains, legumes and pulses, vegetable protein meals, vegetable oils, salt, limestone, bentonite, DCP, Biochar, amino acids, enzymes, vitamins and minerals.

Packaging

Bulk / bulk bag / small 25 kilogram bag.

Green Chicken Chick Starter Ration

From day old up to 4 weeks of age.

Crude	ME	Fat	Starch	Sugar	NDF	Ca	P	Mg	Na	S	K
Protein (%)	Mj/kg	(%)	(%)	(%)	(%)	(%)	(%)	(%)	(%)	(%)	(%)
