

Green Cow Dairy Pellet

Green Cow Stockfeed blends Certified Organic grains and protein meals with BioChar Activated **Feed Additive**, to provide your herd with essential mineral and vitamin requirements for optimum health and productivity.

Our **Green Cow Stockfeeds** offer you an affordable and environmentally friendly option while delivering superior health to your cattle.

Nutrition

Provides essential minerals for cattle, considering the requirements and differences of foraging behavior, age and stage of production. Increases production due to binding of Mycotoxins and positive gut health. BioChar Activated Additive extends retention time of feed and improves the Feed Conversion Ratio (FCR).

Superior Health

The key ingredient is a specially formulated blend of biochar for animal ingestion to improve livestock health through favourable gut micro flora and removal of pathogenic flora (e.g. Campylobacter and Heliobacterium), aiding weight gain and ultimately improving the profitability of your beef operation.

Environmental Benefits

Reduction in nitrogen loss and greenhouse gasses (reduced odour) due to enhanced Cation Exchange Capacity; decreased Ureolytic activity; and decreased PH or aeration. The value of manure is also improved creating a more stable fertiliser with higher nitrogen, phosphorus and potassium (NPK) values and stable carbon to add to soil values for future carbon credits.

GREEN COW DAIRY PELLET

SOFT AGRICULTURE

PRODUCT DESCRIPTION

Green Cow Dairy Pellet is a premium quality and certified organic feed, designed to supplement lactating dairy cattle. The addition of BioChar Activated will increase weight gain, improve feed conversion ratio, decrease methane emissions and improve the health and wellbeing of your cattle.

TYPICAL COMPOSITION

Cereal grains, legumes and pulses, vegetable protein meals, vegetable oils, salt, limestone, bentonite, MDCP, BioChar Activated, vitamins and minerals.
Raw materials may change depending on seasonal variability.

DIRECTIONS FOR USE

- Green Cow Dairy Pellet is not a complete feed. It must be fed in conjunction with roughage or pasture grazing.
- This ration must be introduced slowly to allow the rumen to adapt and to prevent ruminal acidosis. Over a 3-week period, gradually increase the amount of pellets fed and reduce the amount of roughage fed.
- Roughage should make up no less than 20% of the animal's total dry matter intake.
- Ensure that fresh, cool and clean drinking water is available at all times.
- Expected feed intake is 4 - 6kg / head / day, depending on bodyweight and condition.
- Green Cow Dairy Pellet can also be used as a maintenance ration for cattle. Feed in conjunction with roughage. Expected feed intake is approximately 1% bodyweight / head / day for maintenance.

NUTRITIONAL ANALYSIS

| CRUDE PROTEIN | ENERGY (ME) | FIBRE (NDF) | CALCIUM |
|---------------|-------------|-------------|---------|
| 17.8% | 12.8 Mj/Kg | 20% | 1.4% |
| PHOSPHORUS | FAT | STARCH | SALT |
| 0.5% | 3.7% | 25% | 1.4% |
| MAGNESIUM | COPPER | SELENIUM | SULPHUR |
| 0.4% | 22.2ppm | 0.3 ppm | 0.16% |

QUALITY PRODUCT

This product is manufactured under strict quality control standards.

WITHHOLDING PERIOD

Nil.

WARNING

Feed only to cattle. Do not feed to sheep or alpacas. This product does not contain urea or medication.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

STORAGE

Store in a cool, dry, shaded area, protected from vermin.

BEST BEFORE

3 months from manufacture.

PACKAGE SIZE

25kg bags, 500kg bulka bags, 1000kg bulka bags, bulk.
