

CharCoat™

Unlock the future of sustainable agriculture with CharCoat, a revolutionary seed coating solution developed by SOFT Agriculture.

Going beyond traditional chemical-based seed treatments, CharCoat utilises the eco-friendly power of biochar.

The result is a product that offers remarkable absorption, amplified growth potential and unprecedented seed protection. It's not just a seed coating; **it's a pledge for a more responsible and abundant future in farming.**

Suitable for
Pasture seeds
and cereal
crops.

Sustainability & Safety

CharCoat replaces chemical coatings with biochar, offering an eco-friendly and safe alternative for seed treatment.

Unmatched Absorption

Absorbing up to five times its weight, it acts as a nutrient reservoir, enhancing seed germination and early growth.

Optimal Growth & Protection

Boosts seed weight by 200%, aiding precise planting and waste reduction, while shielding against environmental risks.

Incorporating CharCoat into your farming practices elevates your crops' potential and embodies a commitment to sustainable agriculture and environmental responsibility.
